

The graph illustrates the evolution of the number of nodes in the largest component over 15 iterations for different values of  $\alpha$ . The x-axis represents iterations from 1 to 15, and the y-axis represents the number of nodes. All lines start at approximately 10 nodes at iteration 1. As iterations progress, the lines diverge, showing a wide range of outcomes from a sharp drop to a sharp increase in the size of the largest component.
